### **DETAILED ACTION**

The amendment filed 10/25/02 is acknowledged. Claims 2-4 and 9-22 are pending and are considered on the merits.

Applicant is cautioned that amended claims 10-18 were improperly indicated as "new" rather than "amended".

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

#### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 2-4 and 9-22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

At least claims 10, 11, 12, 16, and 17 remain confusing in that the nature of "an optical isomer II" is not clearly defined. Is "the isomer" intended?

The claims are vague indefinite and confusing in that it is unclear what is intended to be encompassed by "reacting a biological material which has an ability of converting". The nature of the "biological activity" is not identified and it is unclear what constitutes "an ability" in this context. It is "the" ability?

The claims fail to find proper antecedent basis for "said optical isomer I". The isomer appears to be designated "1". The claims remain confusing because of the inconsistent recitation "(I)" and (I).

The process of claim 18 remains confusing in lacking a recovery step and in that the nature of the process remains unclear. The claim is rendered indefinite by the use of a word of degree such as "increased" as a limitation, i.e., the extent and manner of increase in the optical purity in this process is not set forth with sufficient particularity..

Claims 13-15 remain vague, indefinite and confusing in that the nature of the "improved" optical purity cannot be determined.

When words of degree, such as "increased" or "improved" are used as a limitation, it is necessary to determine whether the specification provides some standard for measuring that degree. See *Seattle Box Company, Inc. V. Industrial Crating & Packing, Inc.*, 731 F.2d 818, 221 USPQ 568 (Fed. Cir. 1984). In this case, the specification does not enable one skilled in the art to reasonably establish what may be construed as being within the metes and bounds of the word of degree. Therefore, one of ordinary skill in the art would not be apprised as to the claimed invention's scope when the claims are read in light of the specification. See *Ex parte Oetiker*, 23 USPQ2d 1641. In addition, the claims do not set forth with any particularity whether or not an enantiomer is produced. The product is not recovered.

In claims 13-15 the antecedent basis of the phrase "wherein the mixture is not a racemic mixture" is unclear. Is it the original mixture or the mixture produced?

#### ***Response to Arguments***

Applicant's arguments have been fully considered but they are not deemed to be persuasive. For example, the discussion of "(1)" v. "(I)" is noted. However, the correction is incomplete. With respect to definitions for "improved" or "increased", the extent of the improvement or increase in claims 13-15 and 18 for example, is uncertain. The discussion at pages 11-12 of the Response does not provide the necessary clarification. At page 16, lines 3-8 of the specification there is no clear definition of the intended meaning of the terms of degree criticized.

Therefore the rejections are deemed proper and it is adhered to.

No claim is allowed.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final
